***Statement of Reasons for Allowance***

The present claims are allowable over the closest prior art Borel (US 4,292,234) for the following reasons:

The present claims are drawn to a tire comprising an elastomeric composition based on a diene elastomer, an inorganic fillers, and a coupling agent of Formula (I).

Borel discloses a silyl thiosulfenamide used as a coupling agent such as N,N-diethyl-3-(trimethoxysilyl)propylthiosulfenamide (Example II, col. 4) in silica-filled rubber compositions, however, the coupling agent does not have the presently claimed R<sup>2</sup> group.

Thus, it is clear that Borel does not disclose or suggest the claimed invention.

Additionally, it is noted that there is no disclosure or suggestion in the prior art of record that would have provided a proper motivation to introduce the R<sup>2</sup> group in Borel's coupling agent.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
